

Have you ever wanted to get advice on how to care for LTC residents with mental health problems? Available now, a web-based forum, "Long Term Care Mental Health" offers you the opportunity to interact with Geriatric Psychiatrists and Geriatric Internal Medicine specialists from the University of Nebraska Medical Center and other LTC direct care staff interested in the care of residents with dementia. We encourage you to submit your own questions and perplexing cases for review and commentary by the group. The forum includes a repository of cases with outcomes and tip sheets for several common problems such as wandering, aggression, depression, and insomnia. We also provide links to sites with practical information about dealing with behavioral problems, depression, and communication techniques. I hope that you enjoy this opportunity as much as we do. You can sign up and begin by visiting us at

<http://ltcmentalhealth.forumcircle.com/portal.php>
