

# Basic Nursing Assistant Training Manual

All units have been completely updated. Skills have been reviewed and are now comparable with national standards. Cultural beliefs, spiritual needs, palliative care, and professional issues for the Nursing Assistant are included and enhanced.

The student manual includes all worksheets, skills practice procedure documents, and practice tools, which eliminates the need for a separate workbook. The students will have access to a website that contains helpful materials such as PowerPoints and new information.

The instructor manual includes multiple teaching aides including recommended videos from the NHCA video library, relevant websites, and recommended teaching tips. A CD is included that contains PowerPoints for each unit, quizzes, final exams, grade and attendance documents, and procedure checklists.
