by E. A. Kral

Updated May 7, 2010

Since publication of the author's 44-page supplement "Nebraska's Centenarians Age 107 Or Above--1867 to 2001" in the April 24, 2002, *Crete News* and follow-up article on the state's supercentenarians published in the October 2, 2002, *Crete News*, more longevity claims have been validated for persons who have Nebraska connections by birth or by residence and have reached age 110 or above.

For validation of longevity claims, three records are usually needed from the first 20 years of a person's life, including such sources as birth registration, baptismal record, census data, or marriage certificate.

The author was able to validate--with assistance from Gerontology Research Group scholars and volunteers--all the individual supercentenarian reports that follow, along with a brief summary for each.

Clara Herling Huhn (1887-2000) Born near Clarkson, Colfax County, she died at La Mesa, California at the age of 113 years and 327 days. She lived the first 51 years of her life in Colfax County, and is the longest-lived Nebraska native. The second oldest person in Nebraska history and the second longest-lived Nebraska native, she resided in Nebraska her entire life, longer than anyone else in state history. At the time of her death, Stetter was the 2nd oldest living American and the 4th oldest living person worldwide. Worldwide data on validated supercentenarians confirmed by Gerontology Research Group as of June 8, 2007 follow:

Age 122	1	Age 114	41
Age 120	1	Age 113	71
Age 119	1	Age 112	150
Age 117	2	Age 111	272
Age 116	5	Age 110	505
Age 115	13		

The total validated cases of supercentenarians reached 1062 at the time. It is important to note that validated cases primarily represent persons born or resided in Australia and New Zealand, Europe and Japan, and Canada and the United States. As record-keeping becomes more reliable in other nations and as more cases become known and validated, the number of supercentenarians will increase.
