LPN IV THERAPY COURSE

CONTENT

There are new state regulations that require all licensed practical nurses to complete an IV therapy eight-hour didactic course prior to Oct. 31, 2021. All LPNs must complete the training to maintain an active Nebraska license, regardless of whether they will be performing IV therapy in their work setting. This course meets the didactic portion of the new requirement and counts toward the annual continuing education requirement for an LPN license. LPNs who have been previously licensed as LPN-Cs or graduated after May 1, 2016, have already fulfilled the new requirements and do not need to complete the didactic and skills training.

OBJECTIVES

After completing this course, participants will:

1. Discuss peripheral intravenous lines.
2. Discuss central intravenous lines.
3. Describe legal aspects of intravenous therapy.
4. Review infection prevention and control procedures.
5. Identify information contained in the nurse practice act and regulations governing intravenous therapy.

AUDIENCE

This program is designed for LPNs who are required to complete an IV therapy eight-hour didactic course, which may include LPNs who are not LPN-Cs and who graduated before May 1, 2016.

CONTINUING EDUCATION CREDIT

This course is approved for 8 hours of nursing continuing education. Participants must stay in the education program the entire time to receive credit. Continuing education documentation will be provided to registrants upon completion of the course.

HANDOUTS

Printed handouts will not be available. Handouts will be available online. Prior to the program, registrants will receive a link to the handouts. Be sure to include your email address on the registration form.

EVALUATIONS

Please provide your feedback on the course by completing the evaluation. A link to the online evaluation will be emailed to registrants.

SPEAKER

Pam Truscott, MSN, Nurse Educator, RN, Vice President of Professional Development, Nebraska Health Care Association, Lincoln, Nebraska
