QUALITY ISSUES SYMPOSIUM FOR ASSISTED LIVING:
Leadership in Assisted Living: The Key to Quality
Wednesday, August 16, 2017

CONTENT
This program will look at the importance of leadership in assisted living. After defining leadership and looking at theories of leadership, the program will move through how leaders motivate and create engagement, satisfaction and commitment. Participants will explore the talents needed in assisted living and how leaders identify these talents and hire them! The program will close with an exercise that helps each participant identify their own leadership style. With this knowledge, each participant will be given ideas that support strengths and improve weaknesses.

OBJECTIVES
At the completion of the program, participants will be able to:
1. Describe the theories of leadership and the characteristics of a strong leader.
2. State the elements of motivation.
3. Describe the impact of quality of workplace on outcomes.

QUALITY ISSUES SYMPOSIUM FOR NURSING FACILITIES: Making the Connection: Linking the Facility Assessment and QAPI Plan
Thursday, August 17, 2017

CONTENT
The final conditions of participation include the development of a facility assessment and QAPI plan with implementation in Phase 2. The interaction and interconnection of these requirements should not be underestimated. The facility assessment defines the services provided, needed staff competencies, and staffing requirements. Failures in quality may be linked to and analyzed in relation to the facility assessment and the QAPI plan. This program will explore components of the facility assessment, examine the link between the facility assessment and the QAPI plan, distinguish adverse event monitoring, and review regulatory requirements for the facility assessment and QAPI.

Designed as an interactive program, participants are asked to bring a laptop, tablet, phone, or Internet-accessible device for use during the program.

OBJECTIVES
At the completion of the program, participants will be able to:
1. Understand the required content of the facility assessment and analyze and apply the criteria to their facility.
2. Analyze how the facility assessment and QAPI requirements interrelate and are reflected in outcome measures.
3. Evaluate the facility system to identify high-risk, high-volume, problem-prone areas and adverse events reporting.
